ADMIREWORKS X SIMULATIONS LABS

Growth Reset Report and 30-Day Execution Plan

A meeting-ready report built around the live reset already executed: education-first positioning, a cleaner CRM conversion layer, multi-channel sequences, and a narrower MENA rollout plan designed to produce demos instead of just sends.

PREPARED	MEETING FOCUS
March 11, 2026	Growth Reset
PRIMARY KPI	**PRIMARY WEDGE**
Booked demos	Education, MENA

01
Snapshot
Where performance stands now.

02
Reset
What has already changed live.

03
Direction
Why education-first is the right wedge.

04
Roadmap
What the next 30 days should look like.

05
Approvals
What needs alignment in the meeting.

ACTIVE EMAILS SENT

1,000

Active-campaign send volume in Instantly as of March 10, 2026.

REPLIES

1

Current reply rate: 0.1%

BOUNCES

52

Current bounce rate: 5.2%

DAILY CAPACITY

104

Controlled cap after the reset to protect sender health.

EXECUTIVE OVERVIEW

Growth reset summary

This report is designed for the meeting flow: current performance, live reset changes, the new commercial direction, the 30-day rollout, and the decisions needed to move forward with clarity.

The shift

The go-to-market motion is being narrowed to an education-first MENA wedge with one pilot-led CTA instead of broad outreach across unrelated personas.

Already activated

Campaign architecture, CRM hygiene, education lead seeding, and the manual recovery queue are already operating. This is a live reset, not a planning-only proposal.

Meeting decisions

The next 30 days depend on alignment around the education landing page, manual follow-up discipline, and booked-demo KPI.

PERFORMANCE SNAPSHOT

Where performance stands today

The current issue is not a lack of activity. The issue is conversion quality. The reset is intended to improve that by narrowing the wedge, tightening the offer, and forcing follow-through on the warm opportunities already in the system.

Executive diagnosis

Problem is conversion, not reach alone

- The previous motion created activity, but not enough downstream movement.
- The message was too broad across too many personas and use cases at once.
- The funnel had weak proof and no hard operational discipline inside the CRM.
- The reset changes the KPI from “more outbound” to “more booked demos and qualified conversations.”

> The wedge is now education-first: institutions, instructors, and training teams that need measurable hands-on cyber learning without infrastructure overhead.

Reset signals

Already live

OWNERS FIXED

34

Previously unowned CRM records assigned.

FOCUSED TASKS

6

Hot and warm tasks now have dated next steps.

SEEDED LEADS

17

Education-aligned CRM leads synced into Instantly.

8 active campaigns | 1 legacy lane paused | 17 mirrored into Apollo

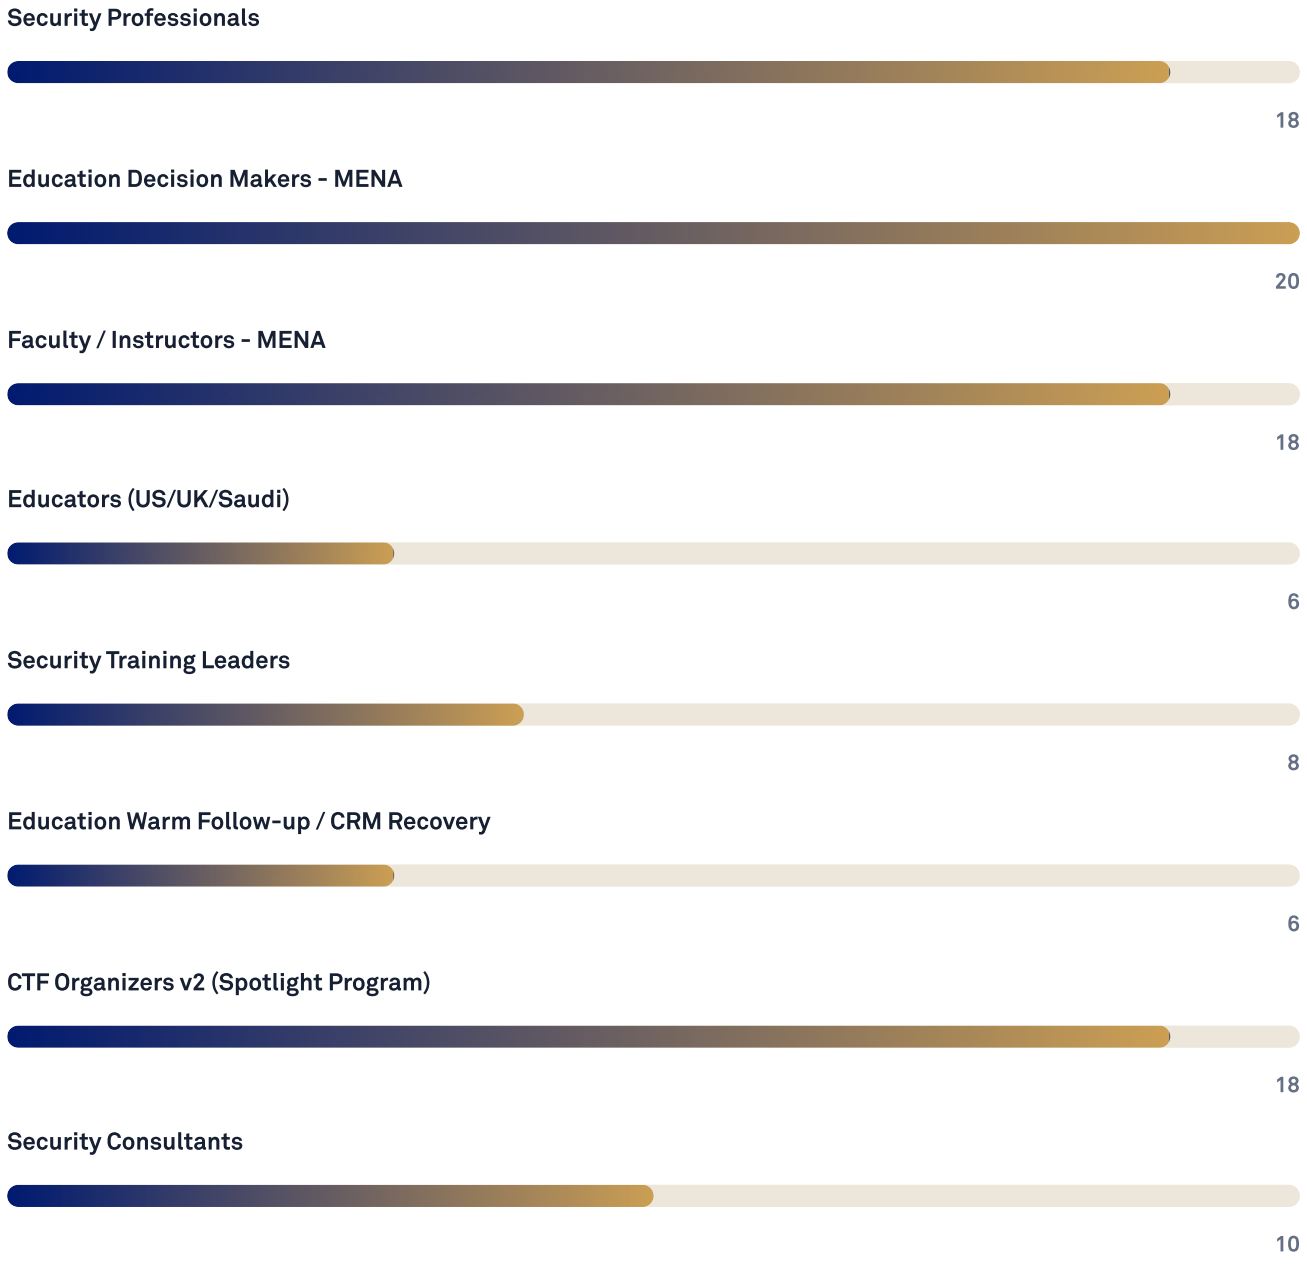
LIVE RESET

What has already changed in market

The campaign mix, CRM cleanup, and education routing are already live. This section shows the operational shift that has already been activated, not just the next plan.

Live campaign mix and daily caps

Current operating shape



CRM board shape

Most value is still in follow-through

New Leads

40

Outreach Sent

24

Follow-up Needed

4

Discovery Pending

2

Immediate conversion queue includes Daniel Mayer, Marwa, Ayman, Sameh Ayman.

What was changed live

Execution complete

Campaign architecture

3

New campaigns created: Education Decision Makers - MENA, Faculty / Instructors - MENA, and Education Warm Follow-up / CRM Recovery.

CRM cleanup

34

Owner assignment and next-action hygiene applied to the active conversion queue.

Education seeding

17

Asana education and recovery leads routed into live campaigns and Apollo labels.

Campaign evidence table

Analytics + config

CAMPAIGN	STATUS	CAP	LEADS	SENT	REPLIES	BOUNCES
SimLabs | Security Professionals	Live	18	1,429	890	1	50
SimLabs | Education Decision Makers - MENA	Live	20	0	0	0	0
SimLabs | Faculty / Instructors - MENA	Live	18	0	0	0	0
SimLabs | Educators (US/UK/Saudi)	Live	6	92	42	0	2
SimLabs | Security Training Leaders	Live	8	131	12	0	0
SimLabs | Education Warm Follow-up / CRM Recovery	Live	6	0	0	0	0
SimLabs | CTF Organizers v2 (Spotlight Program)	Live	18	773	42	0	0
SimLabs | Security Consultants	Live	10	111	14	0	0

Instantly analytics lag the newest education campaigns. The live seed uploads are confirmed in the registry and sync logs even before they show in analytics totals.

BACKGROUND

What was already built, and what we learned from it

Substantial execution happened before the reset. The issue was not lack of work; it was that the original motion was too broad and too weak at the point of conversion.

What Admireworks has already executed

Strategy & Positioning

- Go-to-market strategy with 3-persona framework (CTF Organizers, Educators, Enterprise)
- Competitive analysis covering CTFD, TryHackMe, HackTheBox, and enterprise alternatives
- Market segmentation for US, UK, and Saudi Arabia regions
- Messaging and value proposition framework per audience segment
- Landing page copy and headline variants per audience

Lead Sourcing & Outreach

- 1,921 leads sourced via Apollo across 3 target segments
- 2 cold email campaigns launched with 3-step automated sequences
- 1,669 emails sent to 827 unique contacts
- 69 pipeline leads unified, deduplicated, and quality-scored
- 22 hot leads identified across security, education, and services sectors

Advertising & Media

- Google Ads campaign launched with keyword targeting
- Social media ad creatives designed and reviewed
- Media buying plan developed with channel allocation
- Ad copy variations created for multiple audience segments

SEO & Content

- Full website technical SEO audit completed
- 8 keyword clusters identified and mapped to content plan
- Content strategy: 6-8 blog posts per month planned
- 302→301 redirect fixes identified (14 pages)
- Internal linking strategy established

Platform & Events

- Campaign landing pages created with audience-specific variants
- Platform demo video edited and published
- AI Everything Event participation and lead capture (35 leads)
- 5 Limited Spots Giveaway campaign executed
- Email automation setup via Systeme.io

Why results stalled

Broad positioning

Too many audiences at once — High friction

Proof layer

Old state: weak — Reset: strengthened

CRM discipline

Old state: passive — Reset: active queue

- Generic messaging diluted urgency and fit.
- Warm leads existed, but the system did not force owner accountability.
- The conversion path had no dedicated education landing page or pilot-led narrative.
- Legacy lanes carried bounce risk and distracted the account from the best wedge.

STRATEGIC DIRECTION

The next commercial direction

The next phase is not about sending more of the same outreach. It is about using an education-first offer, a tighter geographic focus, and one pilot CTA that can move qualified prospects into conversations faster.

New growth thesis

Education-first

Primary ICP 4

Universities, instructors, program directors, and training / innovation units.

Primary geography 3

Egypt, Saudi Arabia, UAE for the next 30 days.

Core offer 30

30-day hands-on cyber lab pilot with measurable engagement and readiness outcomes.

Single CTA 1

Book a pilot scoping call.

Landing page and proof stack

Next layer to ship

Hero

Launch measurable cybersecurity labs without building infrastructure.

Who It Is For

Universities, training programs, faculty, and innovation units.

How The 30-Day Pilot Works

Cohort, scope, setup, faculty enablement, and measurement.

Proof Layer

Pilot brief, outcomes framework, proof sheet, and demo deck.

Primary CTA

Book a pilot scoping call.

30-DAY ROADMAP

The next 30 days

The next phase should run as a controlled sprint. The goal is to turn warm and near-fit education leads into meetings, then decide whether the wedge is strong enough to scale.

30-day roadmap

Dated plan

MARCH 10 - MARCH 12, 2026

Reset activation

Campaign reset activated, CRM hygiene applied, pilot materials prepared, and education seed leads routed into the live stack.

MARCH 13 - MARCH 17, 2026

Multi-channel sprint

Manual follow-up on hot/warm leads, education outbound + LinkedIn touches, and landing-page copy finalized.

MARCH 18 - MARCH 24, 2026

Optimization window

Review bounce, reply quality, and demo movement; tighten copy or proof if needed.

MARCH 25 - APRIL 10, 2026

Scale or reposition

Scale only the winning lane, or add a secondary wedge if education does not show enough traction.

Expected outcomes

Ranges, not guarantees

By March 14, 2026 — **6**

All hot/warm records touched manually and routed with a real next step.

By March 18, 2026 — **2**

Discovery calls confirmed or decisively closed from the recovery motion.

By March 24, 2026 — **3-5**

Qualified conversations if the landing page, pilot assets, and manual follow-up are all used.

By April 10, 2026 — **4-8**

Booked demos total, with 1-3 qualified opportunities if the wedge proves out.

OUTREACH SYSTEM

Multi-channel sequence maps

These sequence maps show how email, LinkedIn, and manual follow-up work together for each audience instead of acting as isolated tactics.

Education decision makers

Deans, program leaders, training heads, and institutional owners.

DAY 0 — Email

Pilot-led opener

Lead with the 30-day cyber lab pilot, no infrastructure burden, and one CTA: a pilot scoping call.

DAY 1 — LinkedIn

Light social touch

Profile visit and connection request tied to practical cyber learning, not a generic sales note.

DAY 3 — Email

Send the proof layer

Offer the pilot brief and outcomes framework before asking for more time.

DAY 5 — Call / WhatsApp

Direct qualification

If a real phone or warm path exists, ask whether a pilot scoping call is relevant now or should be closed.

DAY 7 — Email

Close-loop CTA

Simple reply CTA: “Pilot”.

Faculty / instructors

Faculty, lab owners, researchers, and technical skills leads.

DAY 0 — Email

Term-fit question

Ask whether labs, assessments, or practical exercises are running this term and frame SimLabs as the setup bottleneck remover.

DAY 2 — LinkedIn

Faculty relevance note

Short note around making labs and assessments easier to run this term.

DAY 4 — Email

Outcomes follow-up

Offer a short summary around engagement, assessment credibility, and readiness measurement.

DAY 6 — Manual follow-up

Pilot fit check

If engaged, send the pilot brief and ask whether this term or the next is more realistic.

DAY 8 — Email

Close-loop CTA

Ask for a one-word reply: “Pilot”.

Warm recovery / CRM

Follow-up Needed and Discovery Call Pending leads.

24H

Manual email

Owner-led follow-up

Assigned owner sends a direct follow-up with one next step only: confirm the scoping call.

SAME DAY

WhatsApp / Phone

Direct contact

Use phone only when it exists. Confirm timing instead of reselling the whole offer.

DAY 3

Email

Agenda or pilot outline

Send the specific pilot outline or meeting agenda.

DAY 5

CRM decision

Resolve the lead

Move to Discovery Call Done, Nurture, or Lost. No open-ended waiting state.

Manual priority queue

Needs same-day action

Daniel Mayer

03 Follow-up Needed

gtedge

Owner: Sahl

Next action: 2026-03-11 Send tailored follow-up with partnership/use-case angle and propose a 20-minute pilot scoping call.

Marwa

03 Follow-up Needed

Silicon21

Owner: Sahl

Next action: 2026-03-11 Send security training pilot follow-up with measurable outcomes angle and ask for a scoping call.

Ayman

03 Follow-up Needed

Homains

Owner: Nourhan

Next action: 2026-03-11 Follow up with discovery scheduling for the education pilot and confirm if an instructor/program lead should join.

Sameh Ayman

03 Follow-up Needed

S U Tech, Elsewedy University

Owner: Sahl

Next action: 2026-03-11 Send education use-case follow-up and ask for a 20-minute pilot scoping call.

Rabab Nabawy

04 Discovery Call Pending

MSA University | Digilianze

Owner: Sahl

Next action: 2026-03-11 WhatsApp follow-up to confirm discovery call slot and send pilot scoping agenda.

Ahmed Elgyar

04 Discovery Call Pending

Badr Universtiy in Assiut

Owner: Sahl

Next action: 2026-03-11 Email/WhatsApp follow-up to confirm whether the planned demo happened and lock the next call or close to nurture.

LEAD	STAGE	OWNER	COMPANY	NEXT ACTION
Daniel Mayer	03 Follow-up Needed	Sahl	gtedge	2026-03-11 Send tailored follow-up with partnership/use-case angle and propose a 20-minute pilot scoping call.

LEAD	STAGE	OWNER	COMPANY	NEXT ACTION
Marwa	03 Follow-up Needed	Sahl	Silicon21	2026-03-11 Send security training pilot follow-up with measurable outcomes angle and ask for a scoping call.
Ayman	03 Follow-up Needed	Nourhan	Homains	2026-03-11 Follow up with discovery scheduling for the education pilot and confirm if an instructor/program lead should join.
Sameh Ayman	03 Follow-up Needed	Sahl	S U Tech, Elsewedy University	2026-03-11 Send education use-case follow-up and ask for a 20-minute pilot scoping call.

Ahmed Elgyar	04 Discovery Call Pending	Sahl	Badr Universtiy in Assiut	2026-03-11 Email/WhatsApp follow-up to confirm whether the planned demo happened and lock the next call or close to nurture.

Meeting approvals

Decision checklist

1. **Approve education-first as the lead commercial motion**
   Run the next 30 days around institutions, instructors, and training teams in Egypt, Saudi Arabia, and UAE.
2. **Approve the dedicated pilot landing page**
   Use one destination that explains the 30-day pilot, the proof layer, and the booking CTA with less friction.
3. **Approve manual follow-up on warm opportunities**
   The existing hot and warm leads need fast operator follow-up, not more automated waiting.
4. **Approve the KPI standard for this sprint**
   Judge the next phase on booked demos and qualified conversations rather than send count alone.

> This meeting should close with a clear decision on the wedge, the landing page path, the follow-up discipline, and the KPI standard for the sprint.

SUPPORTING EVIDENCE

Evidence behind the recommendation

This final section is here for credibility in the meeting. It shows where the recommendation comes from without forcing the presentation to begin with raw detail.

Prepared by Admireworks. Evidence sources include Instantly live campaign data, Apollo enrichment outputs, Asana CRM state, and the live reset execution logs.
