ADMIREWORKS X SIMULATIONS LABS

Growth Reset Report and 30-Day Execution Plan

A meeting-ready report built around the live reset already executed: education-first positioning, a cleaner CRM conversion layer, multi-channel sequences, and a narrower MENA rollout plan designed to produce demos instead of just sends.

PREPARED

March 10, 2026

MEETING FOCUS

Growth Reset

PRIMARY KPI

Booked demos

PRIMARY WEDGE

Education, MENA

ACTIVE EMAILS SENT

1,000

Active-campaign send volume in Instantly as of March 10, 2026.

REPLIES

1

Current reply rate: 0.1%

BOUNCES

52

Current bounce rate: 5.2%

DAILY CAPACITY

104

Controlled cap after the reset to protect sender health.

Executive diagnosis

Problem is conversion, not reach alone

- The previous motion created activity, but not enough downstream movement.
- The message was too broad across too many personas and use cases at once.
- The funnel had weak proof and no hard operational discipline inside the CRM.
- The reset changes the KPI from “more outbound” to “more booked demos and qualified conversations.”

> The wedge is now education-first: institutions, instructors, and training teams that need measurable hands-on cyber learning without infrastructure overhead.

Reset signals

Already live

OWNERS FIXED

34

Previously unowned CRM records assigned.

FOCUSED TASKS

6

Hot and warm tasks now have dated next steps.

SEEDED LEADS

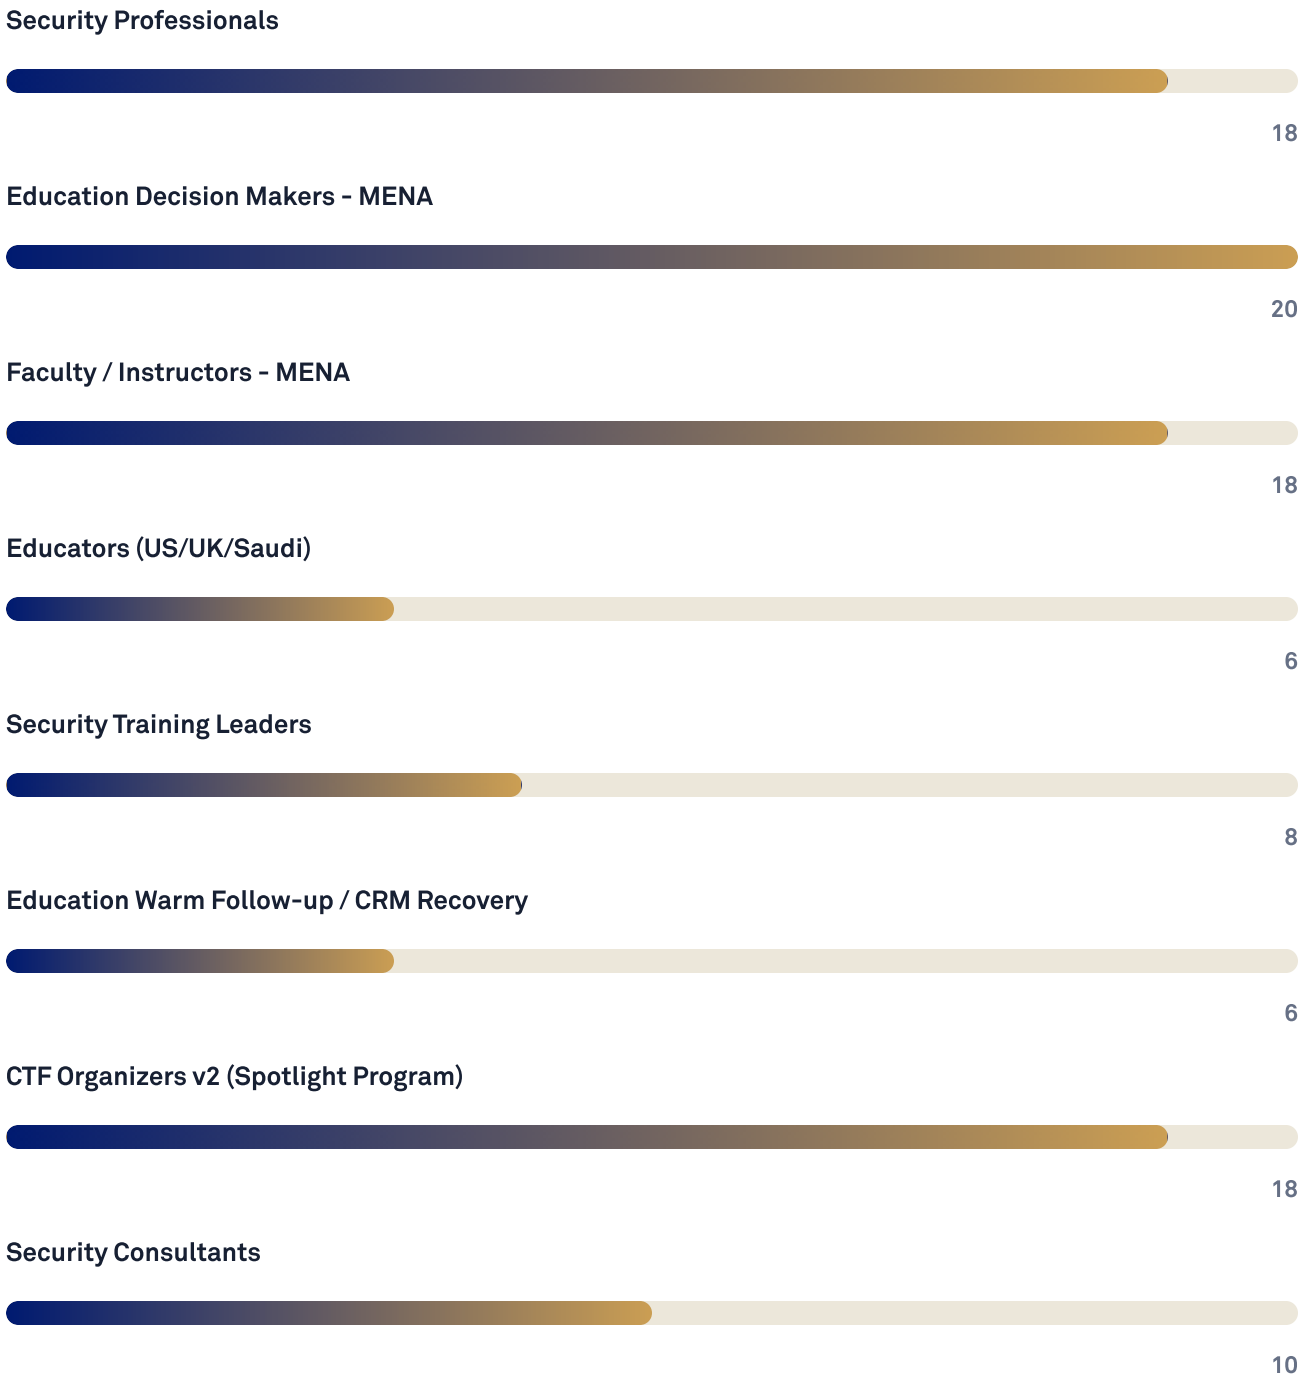
17

Education-aligned CRM leads synced into Instantly.

8 active campaigns | 1 legacy lane paused | 17 mirrored into Apollo

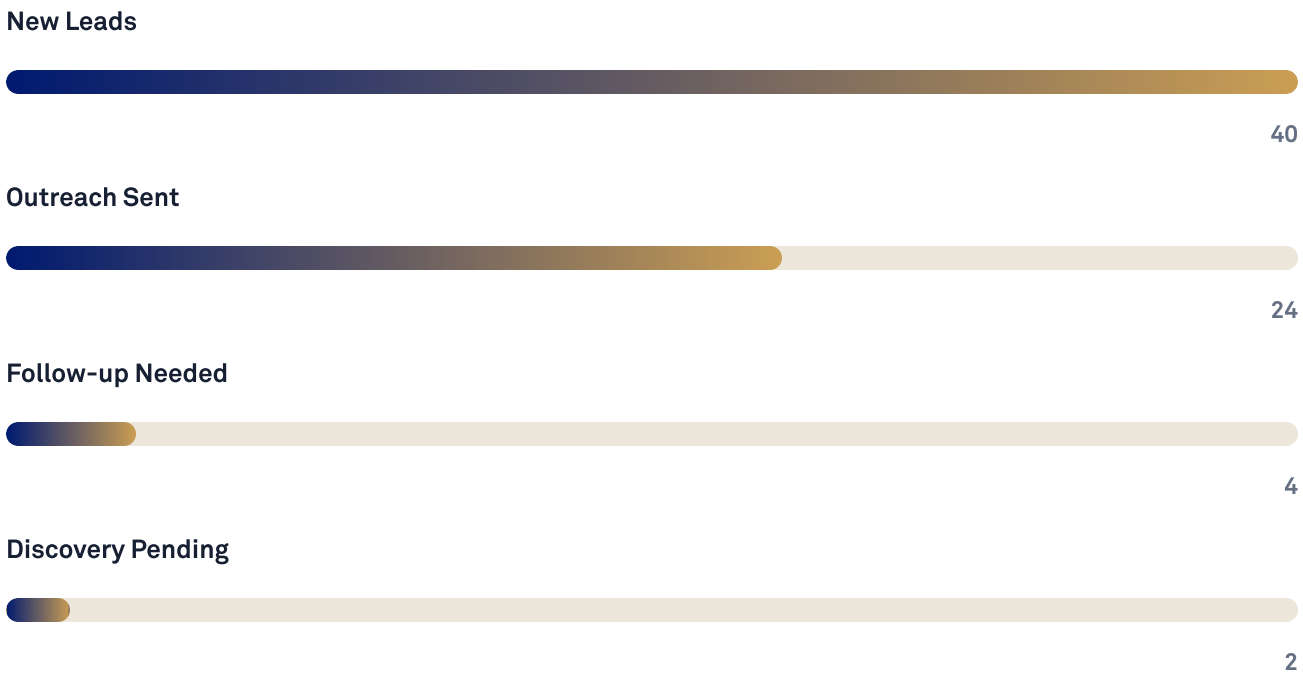
Live campaign mix and daily caps

Current operating shape



CRM board shape

Most value is still in follow-through



Immediate conversion queue includes Daniel Mayer, Marwa, Ayman, Sameh Ayman.

What was changed live

Execution complete

Campaign architecture

3

New campaigns created: Education Decision Makers - MENA, Faculty / Instructors - MENA, and Education Warm Follow-up / CRM Recovery.

CRM cleanup

34

Owner assignment and next-action hygiene applied to the active conversion queue.

Education seeding

17

Asana education and recovery leads routed into live campaigns and Apollo labels.

Campaign evidence table

Analytics + config

CAMPAIGN	STATUS	CAP	LEADS	SENT	REPLIES	BOUNCES
SimLabs | Security Professionals	Live	18	1,429	890	1	50
SimLabs | Education Decision Makers - MENA	Live	20	0	0	0	0
SimLabs | Faculty / Instructors - MENA	Live	18	0	0	0	0
SimLabs | Educators (US/UK/Saudi)	Live	6	92	42	0	2
SimLabs | Security Training Leaders	Live	8	131	12	0	0
SimLabs | Education Warm Follow-up / CRM Recovery	Live	6	0	0	0	0
SimLabs | CTF Organizers v2 (Spotlight Program)	Live	18	773	42	0	0
SimLabs | Security Consultants	Live	10	111	14	0	0

Instantly analytics lag the newest education campaigns. The live seed uploads are confirmed in the registry and sync logs even before they show in analytics totals.

What Admireworks has already executed

Strategy & Positioning

- Go-to-market strategy with 3-persona framework (CTF Organizers, Educators, Enterprise)
- Competitive analysis covering CTFD, TryHackMe, HackTheBox, and enterprise alternatives
- Market segmentation for US, UK, and Saudi Arabia regions
- Messaging and value proposition framework per audience segment
- Landing page copy and headline variants per audience

Lead Sourcing & Outreach

- 1,921 leads sourced via Apollo across 3 target segments
- 2 cold email campaigns launched with 3-step automated sequences
- 1,669 emails sent to 827 unique contacts
- 69 pipeline leads unified, deduplicated, and quality-scored
- 22 hot leads identified across security, education, and services sectors

Advertising & Media

- Google Ads campaign launched with keyword targeting
- Social media ad creatives designed and reviewed
- Media buying plan developed with channel allocation
- Ad copy variations created for multiple audience segments

SEO & Content

- Full website technical SEO audit completed
- 8 keyword clusters identified and mapped to content plan
- Content strategy: 6-8 blog posts per month planned
- 302→301 redirect fixes identified (14 pages)
- Internal linking strategy established

Platform & Events

- Campaign landing pages created with audience-specific variants
- Platform demo video edited and published
- AI Everything Event participation and lead capture (35 leads)
- 5 Limited Spots Giveaway campaign executed
- Email automation setup via Systeme.io

Why results stalled

Broad positioning

Too many audiences at once — High friction

Proof layer

Old state: weak — Reset: strengthened

CRM discipline

Old state: passive — Reset: active queue

- Generic messaging diluted urgency and fit.
- Warm leads existed, but the system did not force owner accountability.
- The conversion path had no dedicated education landing page or pilot-led narrative.
- Legacy lanes carried bounce risk and distracted the account from the best wedge.

New growth thesis

Education-first

Primary ICP 4

Universities, instructors, program directors, and training / innovation units.

Primary geography 3

Egypt, Saudi Arabia, UAE for the next 30 days.

Core offer 30

30-day hands-on cyber lab pilot with measurable engagement and readiness outcomes.

Single CTA 1

Book a pilot scoping call.

Landing page and proof stack

Next layer to ship

Hero

Launch measurable cybersecurity labs without building infrastructure.

Who It Is For

Universities, training programs, faculty, and innovation units.

How The 30-Day Pilot Works

Cohort, scope, setup, faculty enablement, and measurement.

Proof Layer

Pilot brief, outcomes framework, proof sheet, and demo deck.

Primary CTA

Book a pilot scoping call.

Multi-channel sequence maps

Education decision makers

Deans, program leaders, training heads, and institutional owners.

DAY 0 — Email

Pilot-led opener

Lead with the 30-day cyber lab pilot, no infrastructure burden, and one CTA: a pilot scoping call.

DAY 1 — LinkedIn

Light social touch

Profile visit and connection request tied to practical cyber learning, not a generic sales note.

DAY 3 — Email

Send the proof layer

Offer the pilot brief and outcomes framework before asking for more time.

DAY 5 — Call / WhatsApp

Direct qualification

If a real phone or warm path exists, ask whether a pilot scoping call is relevant now or should be closed.

DAY 7 — Email

Close-loop CTA

Simple reply CTA: “Pilot”.

Faculty / instructors

Faculty, lab owners, researchers, and technical skills leads.

DAY 0 — Email

Term-fit question

Ask whether labs, assessments, or practical exercises are running this term and frame SimLabs as the setup bottleneck remover.

DAY 2 — LinkedIn

Faculty relevance note

Short note around making labs and assessments easier to run this term.

DAY 4 — Email

Outcomes follow-up

Offer a short summary around engagement, assessment credibility, and readiness measurement.

DAY 6 — Manual follow-up

Pilot fit check

If engaged, send the pilot brief and ask whether this term or the next is more realistic.

DAY 8 — Email

Close-loop CTA

Ask for a one-word reply: “Pilot”.

Warm recovery / CRM

Follow-up Needed and Discovery Call Pending leads.

24H

Manual email

Owner-led follow-up

Assigned owner sends a direct follow-up with one next step only: confirm the scoping call.

SAME DAY

WhatsApp / Phone

Direct contact

Use phone only when it exists. Confirm timing instead of reselling the whole offer.

DAY 3

Email

Agenda or pilot outline

Send the specific pilot outline or meeting agenda.

DAY 5

CRM decision

Resolve the lead

Move to Discovery Call Done, Nurture, or Lost. No open-ended waiting state.

Manual priority queue

Needs same-day action

LEAD	STAGE	OWNER	COMPANY	NEXT ACTION
Daniel Mayer	03 Follow-up Needed	Sahl	gtedge	2026-03-11 Send tailored follow-up with partnership/use-case angle and propose a 20-minute pilot scoping call.
Marwa	03 Follow-up Needed	Sahl	Silicon21	2026-03-11 Send security training pilot follow-up with measurable outcomes angle and ask for a scoping call.
Ayman	03 Follow-up Needed	Nourhan	Homains	2026-03-11 Follow up with discovery scheduling for the education pilot and confirm if an instructor/program lead should join.
Sameh Ayman	03 Follow-up Needed	Sahl	S U Tech, Elsewedy University	2026-03-11 Send education use-case follow-up and ask for a 20-minute pilot scoping call.
Rabab Nabawy	04 Discovery Call Pending	Sahl	MSA University | Digilianze	2026-03-11 WhatsApp follow-up to confirm discovery call slot and send pilot scoping agenda.
Ahmed Elgyar	04 Discovery Call Pending	Sahl	Badr Universtiy in Assiut	2026-03-11 Email/WhatsApp follow-up to confirm whether the planned demo happened and lock the next call or close to nurture.

Expected outcomes

Ranges, not guarantees

By March 14, 2026 — **6**

All hot/warm records touched manually and routed with a real next step.

By March 18, 2026 — **2**

Discovery calls confirmed or decisively closed from the recovery motion.

By March 24, 2026 — **3-5**

Qualified conversations if the landing page, pilot assets, and manual follow-up are all used.

By April 10, 2026 — **4-8**

Booked demos total, with 1-3 qualified opportunities if the wedge proves out.

30-day roadmap

Dated plan

MARCH 10 - MARCH 12, 2026

Reset activation

Campaign reset activated, CRM hygiene applied, pilot materials prepared, and education seed leads routed into the live stack.

MARCH 13 - MARCH 17, 2026

Multi-channel sprint

Manual follow-up on hot/warm leads, education outbound + LinkedIn touches, and landing-page copy finalized.

MARCH 18 - MARCH 24, 2026

Optimization window

Review bounce, reply quality, and demo movement; tighten copy or proof if needed.

MARCH 25 - APRIL 10, 2026

Scale or reposition

Scale only the winning lane, or add a secondary wedge if education does not show enough traction.

Client meeting decisions

What needs approval

- Approve education-first as the main wedge for the next 30 days.
- Approve Egypt, Saudi Arabia, and UAE as the near-term priority markets.
- Approve the dedicated education pilot landing page as the primary destination for outreach.
- Approve manual operator / founder follow-up for warm leads instead of relying on automation only.
- Approve booked demos and qualified conversations as the KPI standard for this sprint.

> This report should be discussed as a reset plan with live execution already started, not as another broad status update.

Prepared by Admireworks. Evidence sources include Instantly live campaign data, Apollo enrichment outputs, Asana CRM state, and the live reset execution logs.
